**Installation Instructions**

1. Position the mounting channels in the desired location with larger holes facing exterior.

2. With channels vertically aligned, mark screw holes.

3. Drill pilot holes for screws using 9/64” drill bit.

4. Apply a continuous bead of waterproof caulk to the center of the mounting side of channels.

5. Install channels with screws provided.

6. Caulk bottom outer edges of channels to the floor surface.

---

**Operating Instructions**

*Inspect channels to ensure proper working condition.*

**Inserting Shield:** With label facing out, insert the bottom of plate into channels. Lower the shield until there is a firm and even connection with the sill. Tighten the tension screws.

**Removing Shield:** Loosen the tension screws so the shield can be properly removed. Pull straight up on the plate to remove from channel.

**Storing Shield:** Store the shield indoors with no weight against the gasket.
