# INSTALLATION GUIDE

## BKT050, BKT075, BKT1532

### *Installation Instructions:*

1. Prior to installation of door closer or exit hardware, install the perimeter gaskets in accordance with the instructions supplied with your selected perimeter gasket profile.

**NOTE:** Perimeter gasket and mounting bracket must be installed before the door closer. Combined use of this hardware will require the position of the door closer body to be mounted lower on the face of the door.

2. Position mounting bracket over seal where door closer shoe or exit device strike requires bracket to be mounted. Mark the frame to indicate where the holes will be placed.
3. Drill pilot holes for screws provided.
4. Install mounting bracket in place with provided screws.
5. Install door closer shoe or exit device onto mounting bracket following that hardware's manufacturer's instructions

### *Tools Required:*
