# CUTTING EDGE SELF-CLOSING TECHNOLOGY

## 1 ALWAYS A CONSTANT CLOSING SPEED FROM FREEZING WINTER TO SIZZLING SUMMER

If your gate closes too slow, children or pets could sneak through. If your gate closes too fast, it might become a problem for wheelchair users. A loud slamming gate is not only annoying for you or your neighbours, it's also harmful for your gates.

The Active Thermal System, our own cutting-edge development, guarantees a constant closing speed, regardless of the outside temperature.

## 2 ADJUST SPEED AND FINAL SNAP PRECISELY

Some customers prefer their gate to close slowly, while others want it to go a little faster. No problem! All of our gate closers can easily be adjusted in a matter of seconds to the wishes of your customer.

The final snap allows the gate to speed up a little at the end. This way, you are reassured the gate is properly closed. The final snap can easily be adjusted to any need.

### 3 FUNCTIONS COMFORTABLY

The in-house developed High-Helix screws guarantee a consistent functionality and ensure a comfortable opening speed for the elderly or disabled.

### 4 DUST- & WATERPROOF

Our gate closers are equipped with rotary seals. These seals protect the gate closers from dirt or dust particles intruding the mechanism, assuring your customers of worry-free functioning for many years to come.

### 5 CLOSES EVERY TIME

The powerful torsion spring guarantees the necessary closing force. Therefore, your gate will always close: unaffected by strong winds, the width of your gate wing or the outside temperature. You can rest assured.

### 6 100% PROTECTED

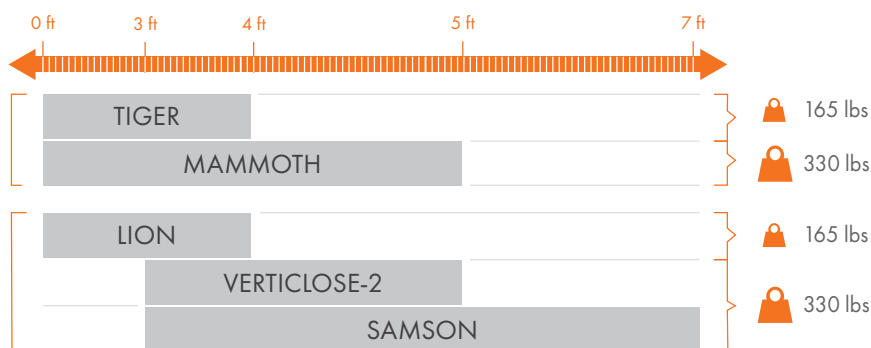

The aluminum powder coated casing guarantees full protection against any weather conditions. The housing is windproof, frost-free and dust- & waterproof, allowing your gate closer to function perfectly.
