# INSTALLATION GUIDE

## Solutions to Door and Trim Damage

Choosing the correct protection bar:

1. Determine traffic - light to moderate use = SD Series, heavy use = HD Series
2. Measure projections - of exit device, door knob, etc.
3. Review product dimensions - to match bar to your specific needs.

**! Warning:** do not locate protection bars where they can impede operation of exit devices.

## How They Work

Without Bar - Costly Damage

With Bar - Safely Deflected Away

## SD Series: Models 1230, 1240, 1250

1. Position protection bar so that traffic will be deflected away, clearing the exit device.
2. Mark screw holes.
3. Drill  $\frac{5}{16}$ " holes for #10-24 sex bolts.
4. Mount bar.
